**5** = Mediocre performance

**4** = Slight stability problems

- 3** = Discoloration Problems  
**2** = Stability problems  
**1** = Major problems  
**0** = Not recommended for use

### **Important Notes:**

End application data applies to experiments carried out by the authors or extrapolated from those experiments using computer algorithms. As application product formulations vary widely this information is only a general guide.

Full testing by both perfumers- flavorists and end users is the only proven method to ensuring a perfume or flavours safety- strength- suitability- stability and success.

Legislation and regulations vary widely and change with time so it is your duty to check this.
