

Sipomer® WAM series

Wet Adhesion Monomers

Contact our experts

Sipomer® WAM series, specialty monomers and effective wet adhesion

Sipomer® WAM series specialty monomers are designed to enhance the wet adhesion, wet scrub and solvent resistance in a wide range of polymer systems.

Product	Sipomer® WAM
Reactive Group	Ally Ether
Recommended Latex Type	Acrylic, Vinyl Copolymers
Product	Sipomer® WAM II
Reactive Group	Methacrylamide

Product	Sipomer® WAM E W50
Reactive Group	Methacrylate Ester
Recommended Latex Type	Acrylic, Styrene Acrylic, Vinyl Acrylic

Sipomer® WAM series benefits

- 1 Exceptional wet adhesion to aged alkyd paints
- 2 Improved Adhesion on polar plastic
- 3 Enhanced wet-scrub resistance
- 4 Resulting binder can be blended as adhesion additive

Sipomer® WAM series features

- Broad applicability
- For all Acrylic, Styrene Acrylic, Vinyl Acrylic
- Ease of incorporation
- Low dosage level : 1.0% (BOTM)
- High reactivity
- Not flammable
